SUMMARY

Hello,

My name is Duc. I'm 28 years old and I really love IT jobs.

I received Bachelors of Information Technology from Thang Long University. Additionally, I hold CCNA certificate and reach 650 TOEIC points. I can work in English fluently.

I have been a part of the IT industry for more than 5 years. During my career, I have worked in Hai Duong city, mostly working with Server and Networking devices. In other hand, I have worked with many other equipment: firewall appliances, fingerprint reader system, card reader system, camera, backup device,...

I enjoy exploring IT world with new technology and skills, mostly with system and platform.

I'm very teamworked person that work well with everyone. My style is "leard hard, work hard, play hard". I like challenging myself to do the same job with another way. When I'm not in front of computer, I'm usually traveling to explore hidden treasures in nature.

I really hope that you can give me opportunity to join your company, that would be great.

Please take a look at my attached profile any my custom profile(Resume.pdf) in online profile for more detail.

Thank you and have a nice day!
